## FULL-STACK DEVELOPER — ANGULAR, ASP.NET CORE, AND JAVA SPRING

I'm a full-stack developer comfortable working with **Angular** on the frontend and **C#** with **ASP.NET Core** and **Java Spring** on the backend. I build clean, responsive web apps and reliable backend services that work seamlessly together. I'm experienced in developing and integrating **REST APIs**, managing **SQL** databases, and optimizing performance for production systems. I'm also confident working in **Linux** environments and enjoy collaborating with both frontend and backend teams to deliver practical, scalable solutions.

---

## PROFESSIONAL EXPERIENCE

**Golden Solution**                                                          **May 2025 - Present**

**Full-Stack Developer — Angular & ASP.NET Core**

- Built a full-stack online ticket sales platform using Angular, SCSS, ASP.NET Core, and MS SQL Server.
- Developed secure user authentication, ticket purchasing (guest & user), seat selection, and payment processing.
- Designed a clean, accessible UI with a focus on usability and responsiveness.
- Created RESTful APIs and wrote backend logic for user accounts and ticket history.
- Contributed to the "Salter" backend: refactored complex SQL queries and exposed them via REST APIs.
- Implemented interceptors, filters, and navigation flow on the frontend.
- Documented the system architecture and integration points to support future development.

**Golden Solution**                                                     **February 2025 - April 2025**

**Front-End Angular Internship**

- Upgraded a back-office system from Angular 10 to Angular 19, enhancing performance and maintainability.
- Created responsive, interactive dashboards and data visualizations using Angular, TypeScript, and SCSS.
- Collaborated with backend developers to implement JWT-based authentication (access + refresh tokens).
- Used AWS Git repositories for version control, resolving merge conflicts and maintaining code quality.
- Documented the upgrade process and new components to support team collaboration.

---

## PROJECTS

**BearlyBlogging:** Spring, Angular, PostgreSQL.

A full-stack blogging platform with secure authentication, blog creation, and dynamic user dashboards.

Live Demo     Source Code

**RitamGrada:** Spring, Angular, MySql.

A full-stack digital ticketing and event tracking platform with modern UI, real-time status, and full admin control.

Live Demo     Source Code

---

## EDUCATION

**Bachelor's Degree in Computer Science**

October 2022 – Present
Faculty of Technical Sciences (FTN), Čačak

## TECH STACK

- **Frontend**: Angular, TypeScript, SCSS, HTML
- **Backend**: ASP.NET Core, Java Spring Boot
- **Database**: PostgreSQL, MySQL, MS SQL Server
- **Other Tools**: Git, REST APIs, JWT, Docker, Linux, AWS Git

---

## CERTIFICATIONS

**SQL Programming Certificate:** Oracle Academy
**Java Programming Certificate:** Oracle Academy

## LANGUAGES

- **Serbian (Native)**
- **English (B2)**
